You're Teaching My Child What?: A Physician Exposes The Lies Of Sex Ed And How They Harm Your Child

Synopsis

Think Sex Ed Is All About The "Facts of Life"? Think Again. If you think sex education is still about the birds and the bees, think again. And it's not about science either. In her shocking exposé, *You're Teaching My Child What?*, Dr. Miriam Grossman rips back the curtain on sex education today, exposing a sordid truth. Today's sex ed programs aren't based on science; they're based on liberal lies and politically correct propaganda that promote the illusion that children (yes, children) can be sexually free without risk. As a psychiatrist and expert on sexual education, Dr. Grossman cites example after example of schools and organizations whitewashing or omitting crucial information that doesn't fit in with their "PC" agenda. Instead, sex educators only tell teens the "facts of life" that promote acceptance, sexual exploration, and experimentation. What sex educators call an education, scientists would call a scam: Sex educators won't tell girls their bodies are biologically and chemically more susceptible to STDs; they will only say 3 million girls have a sexually transmitted infection. Educators say it's natural for children to "explore" their sexuality from a young age and only they can decide when it's right to have sex. The real truth is neurobiologists say teen brains are not developed to fully reason and weigh consequences, especially in "the heat of the moment." Teens are told condoms, vaccines and yearly testing provide adequate protection, without being told that studies now show condoms are no match for herpes, HPV and gonorrhea. In *You're Teaching My Child What?*, Dr. Grossman reveals biological truths that you won't find in today's classrooms. *You're Teaching My Child What?* is critical reading for parents with teens and instrumental in teaching children the truth about sex.

Customer Reviews

This is the first review I have ever written for a book. Never have I ever been so compelled to try and get the word out on an issue. This book **MUST** be read by every parent in the United States. Sex Ed in our schools must be updated. IT is false. I heard Dr. Grossman interviewed on the radio. I was so compelled by her intellect and knowledge of the subject of Sexual Education in the public schools, that I purchased her book. This was a first for me. You see, I have three teenage children, two in college, and one in high school. I thought that it was high time I took a look at what their peers are being taught. Dr. Grossman lays out, systematically and thoroughly in this book, the inaccuracies and outright lies of what is being taught by SIECUS (The Sexuality Information and Education Council of the United States), Planned Parenthood, and Advocates for Youth in our schools, and on websites that are recommended by our schools in the Sex Ed programs and accompanying pamphlets and brochures handed out in the nurses office or during the class. This book starts with showing who is exactly teaching your children. She then covers the topic of the differences between boys and girls, and the false information taught in the SE classes. Next, she talks about the abstinence/protection/do it if it feels right issue, the doctor's responsibility, the plagues of incurable sexually transmitted infections, gender identity and homosexual/heterosexual/transgender/etc. issues. All of these topics are taught to our children in the public schools. If a child doesn't go to a public school, not to worry, most of this information is also available on line from the three above mentioned organizations and their websites, plus the sites that they link from within their sites.

If you think that contemporary sex education is good for our children, reduces teen sex, and reduces the risk of infection and disease, you had better think again. The sex ed crowd is not interested in actually helping kids, but in pushing radical agendas. They will not tell our children about abstinence and moral values; instead they will push every amoral and immoral agenda item there is, be it cross-dressing, sadomasochism, androgyny and "diversity". Instead of helping our children, this group of radical social engineers is in fact harming our kids. Miriam Grossman, M.D., knows all about this. She has been working with young people for decades in this area, and she has seen firsthand the tremendous damage being done to our young people by the very powerful and very insidious sex ed lobby. Says Grossman, "Sex education is not about health - it's a social

movement, a vehicle for changing the world. It happens one child at a time, and it goes on right under your nose." One simply has to look at the sex ed curricula to see the truth of this. Armed with big bucks and harmful ideologies, the militant sex education industry has been doing inestimable damage to our young people, and is using our schools to push their relativistic, anything-goes ideology. Based on the lies and perverted agendas of sexologists like Alfred Kinsey, the sex ed lobby is working overtime to indoctrinate our young, break down their moral values, and turn them into hyper-sexualised individuals. But despite this avalanche of sex education, there has been a huge rise in sexually transmitted infections, teen pregnancies, abortions, and promiscuity. All this tsunami of sex ed has done is compound the problems, not reduce them.
