Study Guide For Introduction To Clinical Pharmacology, 8e

Synopsis

Get the most out of your textbook with this helpful study tool! Corresponding to the chapters in Introduction to Clinical Pharmacology, 8th Edition, by Marilyn Edmunds, this study guide offers a rich variety of learning resources to help you master nursing pharmacology and medication safety. Worksheets in each chapter include review questions, along with math review, dosage calculation exercises, and research and critical thinking activities emphasizing clinical decision-making and prioritization. Correlation to the Introduction to Clinical Pharmacology textbook and Evolve resources reinforces key safety content such as drug interactions, allergic reactions, adverse drug responses, care of the older adult, and cultural considerations. Review sheets help you remember common measures, formulas, and difficult concepts. A variety of learning activities includes short answer, matching, multiple-choice, multiple-select, math review, dosage calculation, and critical thinking exercises. Answers for all activities and questions may be found on the Evolve companion website. Blank medication cards allow you to fill in important drug information to take along to clinicals. Learning objectives and cross references to related materials are provided at the beginning of each chapter.

Book Information
