The Chemistry Of Macrocyclic Ligand Complexes (Cambridge Texts In Chemistry And Biochemistry)

Synopsis

The study of macrocyclic ligand systems represents a major activity impinging on a wide range of areas in chemistry and biochemistry. This book contains an overview of the macrocyclic ligand systems and discusses the structure and properties of macrocyclic systems; the synthesis of macrocycles; polyether crown and related systems; metal-ion and molecular recognition (host-guest chemistry); and kinetic, thermodynamic, and electrochemical aspects of these complexes. The author also covers the various categories of synthetic and naturally occurring macrocycles.

Book Information

Series: Cambridge Texts in Chemistry and Biochemistry

Paperback: 280 pages

Publisher: Cambridge University Press (November 30, 1990)

Language: English

ISBN-10: 0521409853

ISBN-13: 978-0521409858

Product Dimensions: 6 x 0.6 x 9 inches

Shipping Weight: 14.4 ounces (View shipping rates and policies)

Average Customer Review: 5.0 out of 5 starsÂ See all reviewsÂ (1 customer review)

Best Sellers Rank: #6,898,967 in Books (See Top 100 in Books) #31 inÂ Books > Science & Math > Chemistry > Organic > Heterocyclic #1940 inÂ Books > Science & Math > Chemistry > Inorganic #6573 inÂ Books > Science & Math > Chemistry > Physical & Theoretical

Customer Reviews

This book is well representative of the various classes of macrocyclic ligands. It is understandable enough for someone who has a good background in chemistry but isn't very familiar with macrocyclic ligands, yet it would still be quite useful for an experienced inorganic or analytical chemist. Also, there are many illustrations which aid in the visualization of many of the larger ligands.
