# A Laboratory Textbook Of Anatomy And Physiology: Cat Version

## Synopsis

Thoroughly updated throughout, and now incorporating a full color design and art program, the ninth edition of A Laboratory Textbook of Anatomy and Physiology provides students with an accessible, comprehensive introduction to A&P. It is specifically designed for the laboratory portion of a one- or two-term course in anatomy and physiology for students planning a health science, allied health, or health-related career. The texts 15 integrated units use the cat as the dissection animal, while also emphasizing the human anatomy. This classic text is a proven must-have resource and learning tool for the A&P lab!

## Book Information

Spiral-bound: 544 pages

## Customer Reviews

The seller liedIt said no writing like new and there is writing in the book I needed it to have none and that's what I thought I was getting

It's a decent enough anatomy lab book. It has what you need to know for labs that involve cat dissections. There's nothing too fancy about it, but it gets the job done.

Missing pages, and not in good condition.

I like the book, it arrived at normal time and the book meet my expectation . I can tell people about the book or recommend it to the students to let them known how good it is.
