It is often hard to read what a person may be thinking or who they really are. This book provides some insight into analyzing and reading people based on their body language, speech, and other expressions and behaviors that tell in many ways who they are. This was a very good read and I'd recommend it to anybody!

This is an Awesome Book on How To Analyze People.I really like this book.. especially the topic on Being the Best You.. Luke Sutton has done an Awesome Job in including this topic in the book.. Becoming the Best You, meaning you have to become better, so that other people could also relate better to you in every aspect.I also like the topics on Emphatetic Listening and Boosting your Charisma.. these are 'Gold Mines' Ideas in this book.. Luke tackles about how to boost your confidence or charisma towards others. There are lots of valuable advice that he gives inside the book about this topic. He says that 'Glowing confidence is magnetic..'.. which is truly true and awesome..I really like this book to the highest because of the many wisdom incorporated herein, like he also included the 16 Personality Types,, which is really very important to know when dealing with people.He also tackles about personal space, leading others, how you present yourself, habits, non-verbal communications and many more.I highly recommend this book to everyone who wants to have an edge on communicating and dealing with others.With that, I would give Luke Sutton and How to Analyze People with a Very High 5-Star.

I like this book. Ive been very interested on the subject now for a very long time. I know that all people have some other true identity. This book helps exactly with that, understanding the true identity of people. It really well elaborates on the fact that people often do things or say things in a way that conveys their true feelings. I learned that you can understand the person more through their verbal language. There are a lot of things you can learn from this book.

Want to understand others even without having to ask them what they need or who they really are? Get this book and learn about non-verbal cues that will help you understand people better through human interaction. It is almost complete with the discussion of the 16 personality types of different

individuals which will help the reader assess people around them.

Good book, everything was explained very well. The detail in every step was remarkable. Most college business classes use the same formula but Mr. Sutton expresses another side of it. From his perspective. I recommend it to anyone who desires a better direction to go when it comes to others.

This book is a step by step guide to help you analyze people instantly and be an amazing person to them. This is truly awesome as I learned a lot while turning the pages. I realize that those things which does not matter before are truly important to help you understand the individuals that surrounds you.

This is a very informative book on verbal and non-verbal communication, and how to decipher what it means. However, there are so many grammar errors, that sometimes you have to read an entire section over and over to figure out what it actually being said. That's the reason for "4 stars".

Itâ™s a fact that the most usual mistake made is by men judging the first glimpse they get of a woman. Women have the habit of paying very close attention to their appearance when they go out to meet people or even go to work. A sexy appearance always induces sexual comments and conclusions that do not go any deeper. Yet, it is a very frequent phenomenon that it will not be long before men discover that the certain lady is not at all what they expected to say the least.
