The Omniverse: Transdimensional Intelligence, Time Travel, The Afterlife, And The Secret Colony On Mars

Synopsis

A tour through the new science of the Omniverse, its spiritual and physical dimensions, and its incalculable intelligent civilizations • Reveals the key travel and communication technologies of the Omniverse: time travel, teleportation, and telepathy • Unveils newly disclosed state secrets about these technologies, about the findings of the NASA Mars rover missions, and about a secret colony and life on Mars • Explains through science how souls are holographic fragments of God and how they help create planets, solar systems, galaxies, and universes in the multiverse We are all citizens of the Omniverse, the overarching matrix of energy, spirit, and intelligence that encompasses all that exists: all universes within the multiverse as well as the spiritual dimensions centered on the divine Source that many call God. In this scientific guide to the Omniverse, Alfred Lambremont Webre reveals startling replicable evidence about extraterrestrial and extra-universal life, the intelligent civilizations created by souls in the afterlife, top-secret alien technology, and the existence of a secret base as well as life on Mars. The author explains how our souls are holographic fragments of God/Source and how souls and Source are co-creating planets and galaxies as virtual realities for soul development. He addresses Grey alien control over soul reincarnation and also sheds light on the presence of invisible hyperdimensional controllers known as the Archons, who feed off negative energy. Revealing the key technologies of the Omniverse, the author explains how hyperdimensional civilizations communicate telepathically, teleport interdimensionally, and travel through time. He unveils newly disclosed state secrets about government possession of these technologies, the findings of the NASA Mars rover missions, and the secret Mars colony whose permanent security personnel is age-reversed and shot back through time to their specific space-time origin points--with their memories blocked. Integrating science and spirituality, this map of the dimensions of the Omniverse sounds the call for scientific inquiry into the holographic origins of the soul, the potential of time travel, and our role as divine co-creators with Source.

Alfred Webre, JD, MEd, is a lawyer who, in the year 2000, founded Exopolitics, the science of relations between intelligent civilizations in the multiverse. This is his most recent book. It is based upon research he has done over the years with a number of his associates that is reflected in information put out on the website Exopolitics.org which highlights political implications of extraterrestrial life. While it represents leading edge thinking, the conclusions at which Webre arrives are based on evidence from a variety of sources that appear to be genuine and verifiable. His references are extensive, and his bibliography provides a treasure trove of ideas and subjects that warrant further, in-depth study. Some physicists have estimated that the number of universes in the multiverse may exceed 10 raised to the 10-millionth power. That is an enormous number. Webre collectively terms the universes in the multiverse â œexopolitical dimensions.â • The number of intelligent civilizations in all those universes can only be guessed at, but the chances are that it is a very large number, indeed. To this, our author adds a second aspect he calls spiritual dimensions. These include intelligent civilizations of souls, spiritual beings, and Source (God). All put together, he terms the totality the Omniverse. It is postulated that the spiritual dimensions of the Omniverse provide the energy needed for the creation and maintenance of the parallel physical universes of time, space, energy, and matter for which scientists cannot now account. (Webre distinguishes between souls in the â œafterlifeâ • or â œinterlifeâ • and spiritual beings who do not incarnate.
